10 year warranty

Desk / Bench desk / Nomad Table

Structure

leg: rectangular-section steel (2” x 1”1/8 with rounded edges, laser-cut and bent and epoxy powder-coated with an embossed finish. The leg recedes at the front, rear and laterally from the edge of the desk top and it is equipped with adjustment feet (+ 3/8”) for floor levelling.

In the Nomad Table version, the leg is fitted with 2 pivoting, double-tread rubber-coated aluminium castors equipped with brakes (Ø 2”3/8 for the H. 41”3/8 table and Ø 3”1/8 for the table with H. 74”3/8 structure).

longitudinal beams: two for each top, made from rectangular-section steel tubes, with rounded edges and epoxy powder-coated with an embossed finish.

Tops

melamine: 3/4” thick chipboard (density 720 kg/m^3, formaldehyde emission class E1, meets CARB requirements), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges) with matching or contrasting edge.

melamine and glass: consisting of a 1/4 thick glass top, with flat polished edges, etched on the upper side and painted on the lower side, glued to a 1/2” thick melamine top (density 720 kg/m^3, formaldehyde emission class E1, meets CARB requirements), covered with anti-reflection melamine resins and edged with 1/8” thick ABS. The white painted version of the glass is extra-clear.

melamine with tilting cover (RIBA): 3/4” thick chipboard (density 720 kg/m^3, formaldehyde emission class E1, meets CARB requirements), faced with anti-reflex melamine resins and edged with ABS (1/8” thick with rounded edges).

The top has a cover made from an extruded anodised aluminium profile, closed at the ends by a pair of caps. The use of the tilting cover makes it necessary to use the central profile for H. 15”1/8 screens.

The cover is equipped with a hinge, attached to the central screen profile, which allows it to be lifted in order to access the underlying cable tray.

Screens

melamine: 3/4” th. chipboard (density 720 kg/m^3, formaldehyde emission class E1, meets CARB requirements), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges).

fabric: in 3/4” th. melamine (density 720 Kg/m^3, formaldehyde emission class E1, meeting the CARB requirements), coated with anti-reflective melamine resins and edged in ABS (1/8” th. with rounded edges). The panel is then upholstered in fabric, total thickness 3/4”.

glass: 1/4” thick, tempered in accordance with EN 12150 with flat edges, etched on both sides.

Library

melamine: 1/2” thick chipboard (density 720 kg/m^3, formaldehyde emission class E1, meets CARB requirements), faced with anti-reflex melamine resins and edged with ABS (1/8” thick with rounded edges). Equipped with 4 Netbox Spots per side for connecting laptops or other devices.

Be.1

Design: Progetto CMR

Mediawalk

Structure

The structure is composed by a frame made with a rectangular section steel tube (2” x 1”1/8) with rounded edges, laser-cut and painted with an epoxy powder-coated embossed finish. Four Ø 2”3/8 aluminium dual-tread, rubber-coated swivel castors equipped with brakes are screwed onto the lower side of the frame.

Finishing panels

melamine: 3/4” thick chipboard (density 720 kg/m^3, formaldehyde emission class E1, meets CARB requirements), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges).

fabric: in 3/4” th. melamine (density 720 Kg/m^3, formaldehyde emission class E1, meeting the CARB requirements), faced with anti-reflective melamine resins and edged in ABS (1/8” th. with rounded edges), to which a 1/4” thick polyethylene foam adhesive mat is glued. The panels made in this way are then upholstered in fabric, for a total panel thickness of 1”. The panels are pinnable.

writable blackboard: consisting of an mdf panel, 3/4” thick, finished in glossy white laminate for the whiteboard or matt black laminate for the blackboard.

TV stand panel

The panel is equipped with a bracket for attaching the monitor fixed with screws and a Ø 3”1/8 hole for cable management. The bracket is adjustable and can accommodate 40” monitors in W. 27”1/2 panel and monitors from 40” to 65” in W. 55”1/8 panel. The weight of the monitor must not exceed 132,28 lb. The bracket supports VESA 100x100 or 400x400 holes.

The TV panel is available in melamine or upholstered in fabric.

TV stand panel and laptop connection

The panel is equipped with a monitor bracket, which is fixed with screws. The bracket is adjustable and can accommodate 40” monitors. The weight of the monitor must not exceed 132,28 lb. The bracket supports VESA 4” x 4” or 15”3/4 x 15”3/4 holes. The panel also has a Ø 3”1/8 hole for cable management and two Ø 2” holes for Netbox Spot for laptop connection.

The TV panel is available in melamine or upholstered in fabric.

Panel equipped for hanging shelves

Consisting of 5 melamine or fabric upholstered melamine panels. Each panel is equipped with screws for attachment to the structure. Shelves (total 4) are attached between each panel.

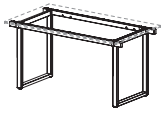

Shelf

Made of a 1/8” th. folded steel sheet, epoxy powder-coated with an embossed finish. The maximum load capacity for each shelf is 4,40 lb.

10 year warranty

Structure

leg: square-section steel tube with rounded edges, laser-cut, bent and welded. The uprights are inclined by 97° and painted with an epoxy powder-coated embossed finish. The leg is equipped with adjustment feet (+3/8") for floor levelling.

longitudinal beams: each top is supported by two beams made from square-section steel tubes with rounded edges, which are attached to the leg brackets. The beams are equipped with slits for hanging modesty panels, cable trays and return tops.

All metal parts are painted with an epoxy powder-coated embossed finish.

intermediate leg: (for connecting several desks in line with each other) consisting of a frame formed by rectangular steel tube segments with rounded edges, cut at 45° and welded together. Welded to the centre of the frame are 2 vertical uprights made from square-section steel tubes with rounded edges. On the inner side of the uprights there are slots for the application of an optional removable cover to conceal the cable descent.

Tops

melamine: 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges) with matching or contrasting edge.

For the D. 35"3/8 desk, a top with 3"1/8 radiused corners is also available.

painted glass: 3/8" thick, tempered in accordance with EN 12150 and with flat polished edges, painted with water-based paints on the lower side (if the painting is white, extraclear glass is used). Equipped with steel studs with a threaded hole, which are glued on the underside.

melamine with tilting cover (RIBA): 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded edges).

The top has a cover made from an extruded anodised aluminium profile, closed at the ends by a pair of caps. Using a tilting cover requires the use of the central screen profile

The cover is equipped with a hinge, attached to the central screen profile, which allows it to be lifted in order to access the underlying cable tray.

Modesty panel

melamine: 3/4" th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges).

Modesty panel for D. 35"3/8 desk with top with rounded corners

melamine: 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded corners). The modesty panel has 3"1/8 rounded corners.

fabric: 3/4" th. melamine (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) upholstered in fabric. The modesty panel has 3"1/8 rounded corners.

Screen

melamine: 3/4" th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins, edged with ABS (1/8" thick with rounded edges). It is equipped as standard with a milling on the lower part for the insertion of the accessory bar (in this case the screen must be rotated 180°).

fabric: in 3/4" th. melamine (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) upholstered in fabric. The screen is provided with a milling on the upper side, hidden under the upholstery, for the insertion of the accessory bar. The fabric must be torn at the milling to insert the profile.

glass: 1/4" thick, tempered in accordance with EN 12150 with flat edges, etched on both sides.

sound-absorbing: panel with recycled polyester fibre interior, 1"1/8 thick (average density 3.12 lb/ft^3), perimeter on three sides with 3/8" thick forex reinforcement. Base in 1"1/8x1"1/8 plywood shaped with sockets for the insertion of fixing hardware. The panel is then upholstered in fabric fixed to the base with metal clips. Total thickness 1"1/4.

10 year warranty

Structure

metal leg support: square-section steel tube with rounded edges, laser-cut, bent, welded and painted with an epoxy powder-coated embossed finish.

leg: made of natural ash with transparent acrylic varnish. The leg is inclined by 97° and it is equipped with adjustment feet (+3/8") for floor levelling.

longitudinal beams: each work surface is supported by two beams made from square-section steel tubes with rounded edges, which are attached to the leg brackets. The beams are equipped with slits for hanging modesty panels, trays and return tops.

All metal parts are painted with an epoxy powder-coated embossed finish.

intermediate leg: (for connecting several desks in line with each other) consisting of a frame formed by rectangular steel tube segments with rounded edges, cut at 45° and welded together. Welded to the centre of the frame are 2 vertical uprights made from square-section steel tubes with rounded edges. On the inner side of the uprights there are slots for the application of an optional removable cover to conceal the cable descent.

Tops

melamine: 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges) with matching or contrasting edge.

For the D. 35"3/8 desk, a top with 3"1/8 radiused corners is also available.

painted glass: 3/8" thick, tempered in accordance with EN 12150 and with flat polished edges, painted with water-based paints on the lower side (if the painting is white, extraclear glass is used). Equipped with steel studs with a threaded hole, which are glued on the underside.

melamine with tilting cover (RIBA): 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded edges).

The top has a cover made from an extruded anodised aluminium profile, closed at the ends by a pair of caps. Using a tilting cover requires the use of the central screen profile.

The cover is equipped with a hinge, attached to the central screen profile, which allows it to be lifted in order to access the underlying cable tray.

Modesty panel

melamine: 3/4" th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges).

Modesty panel for D. 35"3/8 desk with top with rounded corners

melamine: 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded corners). The modesty panel has 3"1/8 rounded corners.

fabric: 3/4" th. melamine (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) upholstered in fabric. The modesty panel has 3"1/8 rounded corners.

Screen

melamine: 3/4" th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins, edged with ABS (1/8" thick with rounded edges). It is equipped as standard with a milling on the lower part for the insertion of the accessory bar (in this case the screen must be rotated 180°).

fabric: in 3/4" th. melamine (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) upholstered in fabric. The screen is provided with a milling on the upper side, hidden under the upholstery, for the insertion of the accessory bar. The fabric must be torn at the milling to insert the profile.

glass: 1/4" thick, tempered in accordance with EN 12150 with flat edges, etched on both sides.

sound-absorbing: panel with recycled polyester fibre interior, 1"1/8 thick (average density 3.12 lb/ft^3), perimeter on three sides with 3/8" thick forex reinforcement. Base in 1"1/8x1"1/8 plywood shaped with sockets for the insertion of fixing hardware. The panel is then upholstered in fabric fixed to the base with metal clips. Total thickness 1"1/4m.

Structure

leg: square-section steel tube with rounded edges, laser-cut, bent and welded. The leg is painted with an epoxy powder-coated embossed finish and equipped with adjustment feet (+3/8") for floor levelling.

longitudinal beams: each top is supported by two beams made from square-section steel tubes with rounded edges, which are attached to the leg brackets. The beams are equipped with slits for hanging modesty panels, cable trays and return tops.

All metal parts are painted with an epoxy powder-coated embossed finish.

intermediate leg: (for connecting several desks in line with each other) consisting of a frame formed by rectangular steel tube segments with rounded edges, cut at 45° and welded together. Welded to the centre of the frame are 2 vertical uprights made from square-section steel tubes with rounded edges. On the inner side of the uprights there are slots for the application of an optional removable cover to conceal the cable descent.

Tops

melamine: 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges) with matching or contrasting edge.

painted glass: 3/8" thick, tempered in accordance with EN 12150 and with flat polished edges, painted with water-based paints on the lower side (if the painting is white, extraclear glass is used). Equipped with steel studs with a threaded hole, which are glued on the underside.

melamine with tilting cover (RIBA): 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded edges).

The top has a cover made from an extruded anodised aluminium profile, closed at the ends by a pair of caps. Using a tilting cover requires the use of the central screen profile

The cover is equipped with a hinge, attached to the central screen profile, which allows it to be lifted in order to access the underlying cable tray.

Modesty panel

melamine: 3/4" th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges).

Screen

melamine: 3/4" th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins, edged with ABS (1/8" thick with rounded edges). It is equipped as standard with a milling on the lower part for the insertion of the accessory bar (in this case the screen must be rotated 180°).

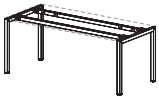

fabric: in 3/4" th. melamine (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) upholstered in fabric. The screen is provided with a milling on the upper side, hidden under the upholstery, for the insertion of the accessory bar. The fabric must be torn at the milling to insert the profile.

glass: 1/4" thick, tempered in accordance with EN 12150 with flat edges, etched on both sides.

sound-absorbing: panel with recycled polyester fibre interior, 1"1/8 thick (average density 3.12 lb/ft^3), perimeter on three sides with 3/8" thick forex reinforcement. Base in 1"1/8x1"1/8 plywood shaped with sockets for the insertion of fixing hardware. The panel is then upholstered in fabric fixed to the base with metal clips. Total thickness 1"1/4.

10 year warranty

Structure

leg: consisting of an upper beam, a lower beam and two side uprights. The upper beam is made from a square-section steel tube with rounded edges. The lower beam and the two side uprights are made of a single rectangular-section steel tube with rounded edges. All parts are laser-cut, bent and welded to a closed shape. All metal parts are epoxy powder coated. The leg is equipped with 2 feet (Ø 1"1/8) made of polyethylene-coated steel that allow +3/8" adjustment for levelling.

longitudinal beams: each top is supported by two beams made from square-section steel tubes with rounded edges, which are attached to the leg brackets. The beams are equipped with slits for hanging modesty panels, cable trays and return tops.

All metal parts are painted with an epoxy powder-coated embossed finish.

intermediate leg: (for connecting several desks in line with each other) consisting of a frame formed by rectangular steel tube segments with rounded edges, cut at 45° and welded together. Welded to the centre of the frame are 2 vertical uprights made from square-section steel tubes with rounded edges. On the inner side of the uprights there are slots for the application of an optional removable cover to conceal the cable descent.

Tops

melamine: 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges).

painted glass: 3/8" thick, tempered in accordance with EN 12150 and with flat polished edges, painted with water-based paints on the lower side (if the painting is white, extraclear glass is used). Equipped with steel studs with a threaded hole, which are glued on the underside.

melamine with tilting cover (RIBA): 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded edges).

The top has a cover made from an extruded anodised aluminium profile, closed at the ends by a pair of caps. Using a tilting cover requires the use of the central screen profile.

The cover is equipped with a hinge, attached to the central screen profile, which allows it to be lifted in order to access the underlying cable tray.

Modesty panel

melamine: 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges).

Screen

melamine: 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins, edged with ABS (1/8" thick with rounded edges). It is equipped as standard with a milling on the lower part for the insertion of the accessory bar (in this case the screen must be rotated 180°).

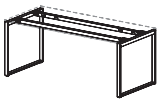

fabric: in 3/4" th. melamine (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) upholstered in fabric. The screen is provided with a milling on the upper side, hidden under the upholstery, for the insertion of the accessory bar. The fabric must be torn at the milling to insert the profile.

glass: 1/4" thick tempered glass (complies with EN 12150) with flat edges, etched on both sides.

sound-absorbing: panel with recycled polyester fibre interior, 1"1/8 thick (average density 3.12 lb/ft^3), perimeter on three sides with 3/8" thick forex reinforcement. Base in 1"1/8x1"1/8 plywood shaped with sockets for the insertion of fixing hardware. The panel is then upholstered in fabric fixed to the base with metal clips. Total thickness 1"1/4.

3year warranty

Structure

3-step desk leg: consisting of a square-section upright (2”3/4x2”3/4) made of 1/8” thick steel inside which slide 2 other 1/8” thick square-section uprights (2”1/2x2”1/2 and 2”3/8x2”3/8 respectively). On the upper part of each upright there is a plastic cover. The leg is fixed by means of 4 screws to a base made of 1/8” thick steel, which is 26”5/8 long and 3”1/2 wide and equipped with Ø 2”3/8 adjustable polyethylene-coated metal feet that allow 3/8” excursion for levelling. A 1/4” thick shaped steel plate is welded to the upper part of the upright to accommodate the motor. The plate has holes for fixing the upper frame by means of screws. Each motor allows a maximum excursion of 25”3/4 (min. H. 24”1/4 max. H. 50” - desktop included).
frame: composed by two telescopic steel tubes with a rectangular cross-section (the outer tube measures 3/4”x1”5/8 while the inner tube measures 5/8”x1”1/8) joined together by transversal connecting plates that are also used to fix the control unit. The two tubes slide according to the length of the top and are locked by means of a dowel on the lower side of the larger tube. The frame is equipped with holes at the bottom for attaching the cable tray if required. Two 1/8” thick, 22”7/8 long and 1”1/8 wide moulded steel brackets are attached to the ends of the frame to secure the top. In the case of the desk with an extension, there is a third leg set at 45° with two 1/8” thick steel plates at the top, measuring 6”1/4x6”1/4. In this desk version, there will be 2 frames running under the tops, both of which will be fixed to the plates of the central leg.

3-step bench desk leg: consisting of a pair of legs joined together by a connecting beam. Each leg is made of a square-section upright (2”3/4x2”3/4) made of 1/8” thick steel, inside which slide 2 other 1/8” thick square-section uprights (2”1/2x2”1/2 and 2”3/8x2”3/8 respectively). On the upper part of each upright there is a plastic cover, while at the base of the main upright there is an adjustable polyethylene-coated metal foot, which allows 3/8” for levelling. A 1/4” thick shaped steel plate is welded to the upper part of the upright to accommodate the motor. The plate has holes for fixing the upper frame by means of screws. Each motor allows a maximum excursion of 25”3/4 (min. H. 24”1/4 max. H. 50” - top excluded).
frame: composed by two telescopic steel tubes with a rectangular cross-section (the outer tube measures 3/4”x1”5/8 while the inner tube measures 5/8”x1”1/8) joined together by transversal connecting plates that are also used to fix the control unit. The two tubes slide according to the length of the top and are locked by means of a dowel on the lower side of the larger tube. The frame is equipped with holes at the bottom for attaching the cable tray if required. Two 1/8” thick, 22”7/8 long and 1”1/8 wide moulded steel brackets are attached to the ends of the frame to secure the top.

connecting crossbeam: made of a 1/8” thick steel plate, bent and painted with epoxy powders. The cross-piece has dimensions W. 22”m D. 2”3/4 H. 3” and is fixed to the main upright by means of brackets. The beam can be inspected and has three 3”1/2x1”5/8 central holes on the inner, outer and lower sides to allow the passage of cables.

Tops

melamine: 1” th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) coated with anti-reflective melamine resins and edged with ABS (1/8” thick with rounded edges).

Control unit

The control unit receives the commands from the push-button panel and synchronizes the activation of the leg motors. It is available with 120 V (US version).

Push-button panel

Fixed with screws on the lower side of the desktop. It has a digital display and allows the user to memorize up to 3 different height positions, associating them with the buttons numbered from 1 to 3.

The push button panel also has an ‘A’ alert button to remind users to change posture. The default time of the reminder is 45 minutes.

The length of the power cable is 55”1/8.

The push-button can be fixed either to the right or left of the top.

Screens

melamine: 1” th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with a reflection-free melamine resin and edged with ABS trims (thickness 1/8”, rounded edges).

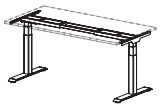

fabric: 1” th. melamine (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/16” thick with rounded edges). The panel is then covered in fabric, total thickness 1”. An optional pinnable version is available, to which a 1/4” thick polyethylene foam adhesive mat is glued, for a total thickness of 1”1/8.

The screen is supported by a pair of 1/8” thick epoxy coated steel brackets. The bracket is fixed to the top and to the screen, both equipped with holes with threaded inserts, with metric screws. The height of the screen compared to the desktop is of 14”7/8.

For bench desks, the screen is supported by a pair of clamps made of 1/4” thick epoxy-coated steel sheet. The clamps are fastened with metric screws to the connecting beams of the leg and the screen, both of which have holes with threaded inserts. The height of the screen is 31”1/2. The screen can also be positioned laterally between the intermediate legs using a clamp support made of 1/8” thick epoxy-powder-coated steel sheet, which must be fixed to the leg’s connecting beams.

POP FOLDING

Structure

Made of two 1/16” th. steel tubes with a rectangular section (3”1/8x2”), each of which is fixed to a 1/8” th. steel tube base measuring W. 2”3/4 D. 26”1/2 H. 3/4”. Two castors with a 2”1/2 diameter are fixed to the base, one of which is equipped with a brake.

All metal parts are epoxy powder coated with an embossed finish.

connecting beam: made of 1/16” thick tubular steel with a rectangular section (1”3/4x5/8”), epoxy powder coated with an embossed finish.

desk top tilting system: made with a device featuring a locking and unlocking position. This system is made of a 1/8” thick steel plate, and is fixed to the leg which is equipped with a pivot that allows the top to rotate 90°.

Top

melamine: 1” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges). The top is equipped with threaded inserts for attachment to the structure and it is fixed to the legs with metric screws. Under the top, in each corner, there are two hooks for connecting the tables to each other. Two of them are fixed pivot, while the other 2 are clips that close around the pivot to fasten the tops together.

Modesty panel

melamine: 3/4” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges). The modesty panel is fixed by means of hinges located under the desk top in order to maintain its perpendicularity even when the desk top is tilted.

POP FOLDING – Height-adjustable

structure: consisting of a central upright with a rectangular section (2”3/8x2”), inside which slides another upright with a square section (1”5/8x1”5/8) allowing it to be raised in height. A lever is placed on the main upright in order to lock the desk top at the desired height. The main upright is fixed to a base consisting of a crosspiece made from a 1/8” thick steel tube with a 2”3/4x1”1/8 rectangular section, connected to two lateral tubes with a 1”5/8x1”1/8 section (1/8” thick). Each tube is equipped with an adjustable foot with a diameter of Ø 1”1/8 that allows a 3/8” excursion for levelling, and a recessed castor with a diameter of Ø 1”1/8 for easy movement. The base has an overall size of W. 25”1/4 x D. 20”3/8.

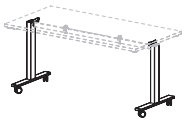

height adjustment: by means of a gas spring which allows a maximum excursion of 15” (H. min 27”3/8 - H. max 42”3/8).

Top

melamine: 1” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges). The top is equipped with threaded inserts for the attachment of an adapter, which is then fastened to the structure by means of metric screws. The adapter is equipped with a lever that allows the top to be unlocked and tilted by 90°. The top has dimensions W. 27”1/2 and D. 23”5/8

Structure

D. 31”1/2 leg: composed of a vertical squared section upright (W. 2”3/8 D. 2”3/8) made of sheet-steel 1/16” thick welded to a 1/8” thick sheet-steel base (W. 27”1/2 D. 27”1/2 H. 3/4”). The base comes with closing caps in ABS 1/16” thick and it is equipped with 2 adjustment feet (+3/8”) for floor levelling.

On the inner side of the upright there are 2 holes (1 upper Ø 1”3/4, 1 lower rectangular 17”1/2 x 25”3/8) for the descent of the cables to the ground.

D. 23”5/8 leg: composed of a vertical squared section upright (W. 2”3/8 D. 2”3/8) made of sheet-steel 1/16” thick welded to a 1/8” thick sheet-steel base (W. 19”5/8 D. 2”3/4 H. 3/4”). The base comes with closing caps in ABS 1/16” thick and it is equipped with 2 adjustment feet (+3/8”) for floor levelling.

On the inner side of the upright there are 2 holes (1 upper Ø 1”3/4, 1 lower rectangular 17”1/2 x 25”3/8) for the descent of the cables to the ground.

longitudinal beam: made of 1/16” thick sheet steel, bent to create an inspectionable cable tray, fixed and secured with screws on the inside of the leg.

All metal parts are painted with an epoxy powder-coated embossed finish

Top

melamine: 1” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges) The desk top is provided with bolts and it is connected to the metal structure through screws.

Modesty panel

melamine: 3/4” th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges).

Screen

melamine: 3/4” th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins, edged with ABS (1/8” thick with rounded edges). It is equipped as standard with a milling on the lower part for the insertion of the accessory bar (in this case the screen must be rotated 180°).

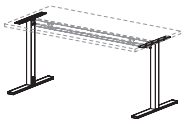

fabric: in 3/4” th. melamine (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) upholstered in fabric. The screen is provided with a milling on the upper side, hidden under the upholstery, for the insertion of the accessory bar. The fabric must be torn at the milling to insert the profile.

glass: 1/4” thick, tempered in accordance with EN 12150 with flat edges, etched on both sides.

sound-absorbing: panel with recycled polyester fibre interior, 1”1/8 thick (average density 3.12 lb/ft^3), perimeter on three sides with 3/8” thick forex reinforcement. Base in 1”1/8x1”1/8 plywood shaped with sockets for the insertion of fixing hardware. The panel is then upholstered in fabric fixed to the base with metal clips. Total thickness 1”1/4.

Lounge Tables | H. 74-75 cm

10 year warranty

Structure for Ø 31”1/2 - 39”3/8 - 47”1/4 table with column and round base

column: made of 1/8” th. steel circular tube (Ø 4”3/4), epoxy-coated with an embossed finish or superficial chromed. The column is fixed to the top by means of a shaped sheet steel plate painted with epoxy powder with an embossed finish.

circular base: made of 1/4” thick sheet steel, dimensions Ø 23”5/8 for tables with a 31”1/2 top diameter and Ø 27”1/2 for tables with a 39”3/8 and 47”1/4 top diameter. The base is epoxy powder-coated with an embossed finish or can be made of polished inox steel (in combination with the chrome column); it is equipped with 6 polyethylene-coated steel feet. The base is provided with a hole to allow the passage of cables from the top.

Ø 55”1/8 - 63” table structure with column and round base

column: made of 1/8” th. steel circular tube (Ø 10”1/4), epoxy-coated or superficial chromed. The column is fixed to the top by means of a cross support.

circular base: made of 1/4” thick sheet steel, dimensions Ø 33”1/2, epoxy powder-coated with an embossed finish or can be made of polished inox steel (in combination with the chrome column), and it is equipped with 8 polyethylene-coated steel feet. The base is provided with a hole to allow the passage of cables from the top.

Table structure with column and square base

column: made of 1/8” th. steel square section tube (W. 3”1/8) with rounded edges, epoxy-coated or superficial chromed. The column is connected to the top through a shaped sheet-steel plate epoxy powder-coated with an embossed finish.

squared base: made of 1/4” thick sheet steel, W. 22”7/8, epoxy powder coated or available in polished stainless steel (in combination with the chrome column). The base is equipped with 6 polyethylene-coated steel feet.

Top

melamine: 3/4”, 1” or 1”1/2 thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges). The top is equipped with threaded inserts for fixing the column. In the case of a table with an electrified column, there is a hole (Ø 3”1/8 or Ø 4”) in the centre of the table top for the placement of cable entry plugs or multi-socket modules.

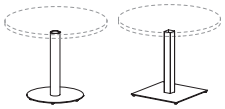

veneer: made of 3/4” or 1”1/2 th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), plated on both sides with natural veneer, approx. 1/32” thick, and edged with veneer or ABS (1/8” thick with rounded edges). The surfaces are painted with acrylic-based paints. The top is equipped with threaded inserts for fixing the column. In the case of a table with an electrified column, there is a hole (Ø 3”1/8 or Ø 4”) in the centre of the table top for the placement of cable entry plugs or multi-socket modules.

painted glass: 1/2” thick, tempered in accordance with EN 12150 and with flat polished edges, painted with water-based paints on the lower side (if the painting is white, extraclear glass is used). Equipped with steel studs with a threaded hole, which are glued on the underside.

etched and painted glass: 1/2” thick, tempered in accordance with EN 12150 and with flat polished edges, etched on the upper side and painted with water-based paints on the lower side (if the painting is white or dove-coloured, extraclear glass is used). Equipped with steel studs with a threaded hole, which are glued on the underside.

Table structure with column and round base

column: made of 1./16” th. steel circular tube (Ø 3”) fixed to the top by means of a shaped sheet steel plate. All metal parts are painted with epoxy powder with an embossed finish.

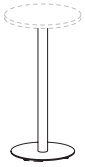

circular base: made of 1/4” thick sheet steel (Ø 19”5/8), epoxy powder-coated with an embossed finish. It is equipped with 6 polyethylene-coated steel feet.

Top

melamine: 1” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges).

Structure

leg: consisting of a single square-section steel tube (W. 1”3/4 D. 1”3/4) with rounded edges. The tube is laser-cut, bent and welded to form the two uprights and the crossbeam. Two brackets are welded onto the crossbeam for the attachment of the longitudinal beams. The leg is equipped with adjustment feet (+5/8”) for floor levelling.

The leg is then reinforced by a lower beam made of a square-section steel tube (W. 1”5/8 D. 1”5/8) with rounded edges. It is attached to the legs through slits on the inside of the lower crossbeam of the legs and, in addition to reinforcing the structure, it serves as a footrest.

All metal parts are painted with an epoxy powder-coated embossed finish.

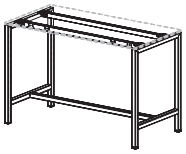

longitudinal beams: made from square-section steel tubes with rounded edges, which are attached to the leg brackets.

Top

melamine: 3/4” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges).

Structure

column: made of a 1/8” steel squared tube with rounded edges, connected through a shaped sheet-steel plate 1/8” thick.

All metal parts are painted with an epoxy powder-coated embossed finish.

squared base: made of 1/4” thick squared sheet-steel, epoxy coated with embossed finish or available in polished inox steel (combined with the chromed cloumn). It is equipped with 4 polyethylene-coated steel feet.

Top

melamine: 3/4” or 1” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges).

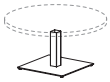

veneer: made of 3/4” th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), plated on both sides with natural veneer, approx. 1/32” thick, and edged with veneer or ABS (1/8” thick with rounded edges). The surfaces are painted with acrylic-based paints.

painted glass: 1/2“ thick, tempered in accordance with EN 12150 and with flat polished edges, painted with water-based paints on the lower side (if the painting is white, extraclear glass is used). Equipped with steel studs with a threaded hole, which are glued on the underside.

etched and painted glass: 1/2” thick, tempered in accordance with EN 12150 and with flat polished edges, etched on the upper side and painted with water-based paints on the lower side (if the painting is white or dove-coloured, extraclear glass is used). Equipped with steel studs with a threaded hole, which are glued on the underside.

Structure

The structure is composed of 3/4" th. chipboard (density 44.95 lb/ft³, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges) and assembled with screws and dowel nuts.

The top is fixed by plastic supports. The inner part is equipped with 3/4" thick melamine beams which help to make the structure more rigid. In the inner corners there are 1/8" thick steel supports that anchor the panels together and have a threaded hole to which the feet are attached.

The plastic feet have a diameter of 1"1/2, a height of 2"3/4 and an excursion of +3/8" for a perfect floor levelling. The 1" gap between the floor and the module ensures continuous wiring of the various elements.

The 17"3/4 x 17"3/4 module is equipped with 2 feet and 2 black swivel castors with a diameter of 2"5/8 for easy movement. A set of 2 castors for all other elements is available on request.

The basic modules must be fixed to each other with 1/8" thick steel brackets. The rear elements are fixed to basic elements with screws.

The modules can be drilled at the top to insert lamps and plant pots, and can be connected with Versapick.

Cushion

Composed of a Ø 15"3/4 circular melamine panel and 2,50 lb/ft³ polyurethane foam padding. Upholstered in fabric with non-slip PVC base.

Plastic pot

The vase pening has a diameter of 6"1/4. Fits inside the 5"1/2 diameter hole.

Flow Glass T2 lamp (Rotaliana)

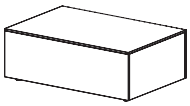

Lamp consisting of matt white metal stem and round base with blown-glass diffuser. Fits inside the 10"1/4 diameter hole.

Versapick

For charging smartphones, tablets and rechargeable devices. Equipped with 2 USB sockets 1 type A and 1 type C.

Structure

The structure is composed of uprights and beams made from a 1/8” square-section steel tube (3/4”x3/4”) with 1/8” rounded edges, laser-cut, welded and embossed painted, to which 2 beams are welded, one in the middle and one at the base.

The beams have laser cut holes for inserting 1/4” thick steel dowels, and are required to reinforce the structure and support the storage tray.

Four Ø 2”3/8 aluminium swivel and rubbered castors are provided with brakes.

Blackboard brackets

2 brackets made of a 1/16” thick steel sheet, laser-cut, bent and welded to form a U shape.

Each bracket has 2 holes, each of which houses a Ø 3/8” steel rod which is required to support the blackboard.

Blackboard

Made of 3/4” thick mdf, with 1 side that can be written on, finished in glossy white laminate for whiteboard and matt black laminate for blackboard. The whiteboard can be written on with erasable markers, while the blackboard can be written on with chalks or liquid chalks markers.

Monitor holder

Consists of 2 steel sheet elements (1/8” thick for the front element, 1/32” thick for the rear cover element) cut, bent, embossed painted and connected to the beams with screws.

A monitor holder bracket is attached to the front element, which is also provided with a 2”1/2x1”3/4 rectangular hole for the cables to pass through.

The bracket is adjustable and can accommodate monitors from 40” to 47”. The weight of the monitor cannot exceed 132,28 lb. The bracket supports VESA 4” x 4” or 15”3/4 x 15”3/4 holes.

The monitor holder can also be installed at a later date.

Object holder

Made of a 1/16” thick steel sheet, cut, bent and embossed painted. The object holder rests on the central beams.

TERMS AND CONDITIONS OF SALE

1. INTRODUCTION

These Terms and Conditions of Sale ("Terms") govern the sale of products and services (individually and collectively, "Products") by Design Furniture Solutions, LLC., DBA Frezza America ("Seller"), a Florida limited liability company, to you - the end customer ("Buyer"). By placing an order and/or paying for any Products, the Buyer agrees to be bound by these Terms. These terms supersede and take precedence over any other terms and conditions Buyer may have proposed with respect to the purchase of any Products. These Terms and any price list provided by Buyer shall not constitute an offer or create any exclusive relationship, and may be amended at any time.

2. BUYER'S ORDER

Buyer's order for Products (a "Purchase Order") must be in writing and must provide complete physical address, telephone number, email address, for both billing and shipping purposes. Purchase Orders will not be entered into production until Seller has received all the necessary information and the sale deposit. Seller is not obligated to accept any Purchase Order, and may reject any Purchase Order, with or without cause or reason, in its sole and absolute discretion. Seller's acceptance of a Purchase Orders will be by means of a written acknowledgment, and such acceptance is contingent upon receipt of the corresponding deposit. Buyer is responsible for reviewing Seller's acknowledgment to verify that all the information is correct. Any changes must be made within forty-eight (48) hours from receipt of Seller's acknowledgment (the "Review Period") - otherwise the order will be produced according to the Purchase Order, as accepted and acknowledged by Seller. Upon expiration of the Review Period, Buyer may not cancel the order. If Seller, in its sole discretion, agrees to cancel the order, a cancellation or restocking charge, up to the total amount of the order, may be charged. No agent, representative, or salesperson is authorized to change prices, discounts, terms, or conditions of sale, without Seller's prior written authorization.

PLEASE NOTE: It is Buyer's responsibility to notify Seller of specific and local fire code and safety regulations for final Product destinations, and such notice must be included in the Purchase Order (for purposes of price quotes, such notice should also be made at the time of requesting the quote). Seller reserves the right to make changes in price, dimensions, design, materials, and/or construction, without notice at any time prior to Seller's acceptance of a Purchase Order. All measurements and weights are approximate, and subject to change without notice.

3. PRICES AND PAYMENT TERMS

3.1. Prices. Product prices are stated in U.S. Dollars, Ex-Works/EXW (INCOTERMS 2020) Seller's facilities in USA. Prices do not include shipping charges, packing and crating charges, in-transit insurance, storage charges, sales, use, or other taxes, or installation. Prices may be changed unilaterally by Seller at any time prior to acceptance of a Purchase Order and, if the cost of raw materials or production increases by more than 3% (three percent) during the period between Seller's acceptance of the Purchase Order, and the delivery date, Seller may unilaterally increase the sales price to cover such increase.

3.2. Price Adjustment for Tariff Changes. If, following Seller's acceptance of Buyer's Purchase Order, there is an increase of more than three (3%) in any tariffs, duties, or similar governmental charges imposed on the importation of the Product(s) under the Purchase Order, Seller may (in its sole discretion) increase the price of the pertinent Product(s) in an amount equal to the cost of the increase incurred by Seller with respect to such Product(s). In such case, Seller shall notify Buyer in writing.

3.3. Payment Method. Payment shall be made in U.S. Dollars by bank transfer, check, or credit card payments (subject to a convenience fee).

3.4. Payment Due Date. Payment in full is due in advance of delivery, with a fifty percent (50%) non-refundable deposit due on or before Seller's acceptance of the Purchase Order [OR - If the order contains custom specifications, a 100% non-refundable deposit is required]. Buyer waives and agrees not to claim any offsets based on separate orders.

3.5. Late Payment. Seller reserves the right to suspend delivery, charge storage costs, and charge interest at a rate of eighteen percent (18%) per annum from the date payment is due and until Seller receives payment in full. In addition, Seller may cancel pending Purchase Orders (even if already accepted by Seller) if Buyer fails to make timely payment of any Purchase Order.

4. DELIVERY

4.1. Delivery Ex-Works/EXW. All Products are sold and delivered to Buyer, Ex-Works (EXW) (Incoterms 2020) Seller's facilities in USA. Risk of loss or damage to the Products shall pass to Buyer when Products are placed at the disposal of Buyer or Buyer's carrier at such facilities (receipt of the Products by Buyer or Buyer's carrier shall constitute a delivery). Any documentation relating to the order of the Products shall be deemed to be validly executed on behalf of the Buyer upon execution by Buyer or any employee, agent or carrier of Buyer (even if such individual has not been given full authority by Buyer to bind Buyer). Buyer shall be responsible for insuring the Products upon delivery. Upon delivery, Buyer or Buyer's carrier shall be responsible for transportation of the Products to the destination specified in Buyer's order.

Packaging, marking, and labelling will be done in accordance with the applicable legislation in the place where Seller's facilities are located. Buyer is responsible for ensuring that the packaging, marking, and labelling of the Products comply with the legislation applicable at the Products' final destination.

4.2 Shipping. If the Purchase Order designates a destination (as opposed to pick-up at Seller's facilities) for delivery of the Products, the Products shall nevertheless de deemed to have been delivered Ex-Works (EXW) (Incoterms 2020) Seller's facilities in USA, upon collection at such location by the carrier, which carrier may be selected by Seller in its sole and absolute discretion. All shipments must be prepaid, unless Seller has been instructed to ship freight collect. Seller does not guarantee the arrival time of any shipment, nor shall Seller otherwise be liable for the performance of the carrier.

4.3. Delivery Date. The estimated delivery date for the Products will be stated in Seller's acceptance of the order. Seller may deliver all or part of any order of Products in advance, or subject to a reasonable delay, without Buyer being entitled to cancel the order (in whole

or in part), claim compensation or indemnity, or obtain any other relief that is not expressly set forth herein. Seller shall not, under any circumstances, be responsible for delays in delivery due to force majeure, failures by third parties, product availability, provisions put into force by public authorities, strikes, etc., or any other cause beyond the reasonable control of Seller (including but not limited to delays by suppliers).

4.4. Refusal of Delivery. Buyer will be deemed to have refused delivery of the Products upon the expiration of five (5) calendar days from the date Seller notifies Buyer that the Products are available for delivery, or such earlier date as Buyer notifies Seller of its refusal to take delivery. Any costs or expenses incurred by Seller due to Buyer's refusal to take delivery of the Products will be charged to Buyer. Without limiting the foregoing, should Buyer refuse to take delivery of the Products (in whole or in part), Seller may declare the order cancelled in whole or in part, store the Products at Buyer's sole risk, and seek damages, without limiting any other relief to which Seller may be entitled at law or in equity.

4.5. Risk of Loss. Risk of loss or damage to the Products passes to the Buyer upon delivery, or Buyer's refusal of delivery.

5. INSPECTION

All Products are delivered by Seller in good condition. Buyer must inspect all Products immediately upon receipt, prior to signing the paperwork indicating acceptance. Any discrepancies, damages, shortages, and other non-conformities related to the Products must be filed by Buyer, as applicable: (a) for external damage, immediately upon delivery; (b) for missing items, immediately upon delivery; and (c) for concealed damage, within five (5) calendar days from delivery.

6. WARRANTIES

6.1. Limited Warranty. Seller warrants to Buyer that the Products will be free from defects in material and workmanship for ten (10) years from the date of delivery to Buyer, unless otherwise stated for specific products in the price list. The warranty for manufacturing defects of mechanisms, electrical mechanism, electronic, mechanical, hydraulic and pneumatic components lasts 2 years from the date of delivery to Buyer. This warranty is non-transferable, and any unauthorized repairs and modifications shall render the foregoing limited warranty void.

6.2 Exclusions. Seller's limited warranty (set forth above) does not cover defects in materials supplied by the Buyer or damage caused by accident, transportation, abuse, misuse, neglect, alterations, modifications, normal wear and tear, or other condition not existing at the time of delivery of the Products.

6.3 DISCLAIMER. SELLER MAKES NO WARRANTY TO ANY THIRD PARTY AND, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, SELLER EXPRESSLY DISCLAIMS ANY ALL EXPRESS WARRANTIES (except the limited warranty to Buyer as set forth above) AND IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT. WE DO NOT WARRANT THAT THE PRODUCT WILL MEET YOUR REQUIREMENTS.

6.4. Warranty Claims and Support. To submit warranty claims and obtain warranty support services, the Buyer must contact Seller's customer service department at customercare@frezzamerica.com. Buyer must provide proof of purchase and a detailed description of the defect or issue to obtain service or relief for a warranty claim.

Upon timely receipt and verification of a valid warranty claim, Seller shall repair, replace, or provide a prorated rebate of the full purchase price of the Product as the sole and exclusive remedy for a breach of warranty. Replacement parts will be released at the same delivery point of the order for the original items that are being replaced. Seller may require the return of Products, or parts thereof, that Seller chooses to repair or replace. Buyer may not return any Products, or parts thereof, without Seller's prior written authorization. All returns shall be subject to verification on arrival at the location specified for the return of the Products or parts.

6.5 No Agency. Buyer is not authorized or empowered to make any representations or warranties on behalf of Seller, or to otherwise bind Seller to any obligation to any third party. Any warranty provided by Seller to any end customer shall be affixed to the Product, and Buyer may not alter or modify any such warranty in any manner.

7. RETURNS

Except as expressly set forth herein, no Products may be returned to Seller, and no refunds will be made by Seller.

8. LIABILITY

8.1. Limitation of Liability. Seller's entire liability for any claim arising out of or relating to the Products, including but not limited to the sale and use thereof and warranty claims, shall not exceed the purchase price of the corresponding Products.

8.2. Exclusion of Damages. Seller shall not be liable for any indirect, incidental, consequential, or special damage arising from or relating to the Products or the sale or use thereof.

8.3 Applicability. The limitation of liability and exclusion of damages herein apply in any action or proceeding, whether based on contract, negligence, or otherwise, even if Seller has been advised of the possibility of such liability, damages, loss, or injury.

9. INTELLECTUAL PROPERTY

The Product models shown in Seller's catalogues and described in price lists, as well as the trademarks and tradenames are, and remain, the property of Seller and/or Seller's suppliers, and are protected by trademark and/or copyright law. Seller reserves all rights to the design of the models shown. Many of the designs and technical features are further protected under international patents, either existing or pending. Seller protects all trademarks and products design by means of registration in the corresponding public offices. The reproduction of Seller's

catalogues, price lists, brochures, drawings, and all technical documentation is strictly prohibited. Advertising of the Products is prohibited unless authorized in writing, in advance, by Seller. Unless authorized in writing by Seller and/or its supplier, Buyer is not entitled to any right or license to use any of the intellectual property described herein. Buyer shall not either directly or indirectly reproduce or simulate, or cause or allow anyone to reproduce or simulate, any of such intellectual property. Further, Buyer is strictly prohibited from reproducing, or causing any third party to reproduce, any of the Product models or designs.

10. CHOICE OF LAW AND FORUM

Any controversy or claim arising out of, or relating to these Terms, or the sale or use of the Products, shall be determined by arbitration as governed by and interpreted under the internal laws (as opposed to conflicts of laws provisions) of the State of Florida, and the Federal Arbitration Act, administered by the American Arbitration Association under its Commercial Arbitration Rules (or, if the parties are domiciled in different countries, its International Arbitration Rules) in effect at such time and agree to execute any and all paperwork necessary to effectuate same; provided, however, that (a) either party may request and obtain preliminary injunctive relief pursuant to the applicable law (pending and subject to the arbitration award), and (b) the Florida statute of limitations (including without limitation, Chapter 95, Florida Statutes) are applicable to any claim arising out of, or relating to these Terms or this arbitration agreement. All arbitration hearings shall be conducted in the English language and shall be held in Miami-Dade County, Florida, U.S.A., by a single arbitrator who, at the request of either party, shall provide a written reasoned opinion. The award of the arbitrator shall be final and binding and judgment thereon may be entered by a court of competent jurisdiction. Should any provision, section or part of the Terms or this arbitration agreement be deemed illegal, invalid or unenforceable by a court of competent jurisdiction, that element of the Terms or this arbitration agreement may be severed and shall not affect the validity or enforceability of the remaining portions of these Terms or this arbitration agreement in that jurisdiction and judgment on the award rendered by the arbitrator(s) may be entered in any court having jurisdiction thereof. Each party agrees that service of process may be effected by notice given pursuant to the terms for notices given hereunder. In legal proceedings instituted to enforce these Terms and/or this arbitration agreement, the party who prevails in such proceedings shall be entitled to the award of its reasonable attorney's fees and dispute resolution costs, plus fees and costs incurred by it in executing and/or collecting any judgment, at all trial and appellate levels. This provision shall continue in full force and effect subsequent to and notwithstanding the expiration or termination of these Terms. The United Nations Convention on Contracts for the International Sale of Goods and the United Nations Convention on the Limitation Period in the International Sale of Goods, as amended from time to time, are excluded from application to these Terms or this arbitration agreement.

11. MISCELLANEOUS

These Terms will be binding upon and inure to the benefit of the Parties, their respective heirs, personal representatives, successors, and assigns. All remedies set forth herein are cumulative and are in addition to any other remedies available at law or in equity. These Terms shall not be interpreted or construed more strictly against the party causing these Terms to be drafted. No amendment, modification, termination, or attempted waiver shall be valid unless in writing signed by the party against whom the same is sought to be enforced. These Terms constitute the entire agreement between the parties hereto, and supersede all prior agreements, understandings, and arrangements, both oral and written between the parties hereto, with respect to the subject matter hereof. These Terms shall be construed and governed by the laws of the State of Florida, USA, without regard to its conflict of laws rules or comity. These Terms may be executed and delivered electronically and/or in hardcopy, in one document or in counterparts, each of which shall be deemed a duly delivered original and all of which together shall constitute one and the same instrument.
