Design: G.Perin & G.Topan

10 year warranty

Vertical internal structure

melamine: 3/4” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/32” th.). It is equipped with a 1/4” high adjustment aluminium foot (+1/2) for floor levelling. The panel is provided with a hole for the passage of led light cables. The finishing baseboard is attached to the lower edge of the panel.

Finishing baseboard

Made of 1/32” thick folded metal sheet, H. 2”1/2, epoxy powder-coated with an embossed finish.

Finishing panels

melamine: 3/4” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/32” th.).

lacquered: 3/4” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/32” th.). The surface is covered with a polyurethane-based lacquer in a glossy or matt version.

The front finishing panels, with a height of 18”1/2, are interchangeable with each other, while the corner finishing panels are joined at 45° on the edge.

Closing and intermediate side

melamine: 1” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges).

lacquered: 1” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges). The surface is covered with a polyurethane-based lacquer in a glossy or matt version.

Each panel is equipped with adjustment feet (+3/8”) for floor levelling. The intermediate side has a Ø 3”1/8 hole for cable passage.

Reception desk top

melamine: 1” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges).

The tops have a depth of 28” and are fitted as standard with a metal top access; the lowered reception modules top have a depth of 29”1/2 or 41”3/8

Finishing top

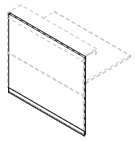

It has a height of 2”3/4 obtained by folding 3/4” thick mdf panels. The depth of the top is 8”1/4. All rectangular tops are drilled in advance on the inner part in a central position for possible attachment of the glass shelf.

Shelf

glass: 3/8” thick, tempered in accordance with EN 12150, made of extra-clear glass with flat edges.

Reception module

Composed by a frontal panel, top shelf and its support brackets .

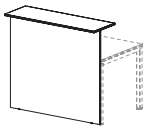

Frontal panel and shelf are made from 3/4” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS 1/32” th. for the frontal panel and 1/8” th. for the shelf. Each front panel is equipped with 2 steel feet (3 for panels of 70”7/8 or more in length) covered with polyethylene. The frontal panels and shelves are joined together using tie rods. The brackets for the shelf’s support, located on the inside, are made of metal and fixed with screws. The shelf has a depth of 15”3/4, and protrudes 4”1/4 from the panel.

End sides

made of 3/4” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges) on the exposed sides. The side is equipped with 2 steel feet covered with polyethylene.

10 year warranty

Structure (Sides, top, bottom and back)

melamine: made with chipboard (density 44.95 lb/ft³, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), 3/4" th. (sides, top, bottom) and 1/2" th. (back), faced with anti-reflex melamine resins and edged with ABS on visible sides. The bottom is provided with 5 feet (Ø 1"5/8, H. 3/8") made of polyethylene with threaded steel pin which allow an adjustment of +3/8" for floor levelling.

Doors

melamine: 3/4" thick chipboard (density 44.95 lb/ft³, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/16" th. with rounded edges).

lacquered: 3/4" thick chipboard (density 44.95 lb/ft³, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/16" th. with rounded edges). A polyurethane-based lacquering covers the surface.

veneer: 3/4" chipboard (density 44.95 lb/ft³, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), plated on both sides (thick 3/4") with natural veneer (thick about 1/32") and edged with veneer or ABS (depending on the finishing) with a thickness of 1/8", with rounded edges.

painted glass: 1/4" thick, tempered in accordance with EN 12150 and with flat polished edges, painted with water-based paints on the inner side (if the painting is white, extraclear glass is used).

etched and painted glass: 1/4" thick, tempered in accordance with EN 12150 and with flat polished edges, etched on the external side and painted with water-based paints on the inner side (if the painting is white or dove-coloured, extraclear glass is used).

Doors opening

2 differents opening types:

- Push-pull: a device is installed on the structure's top or on the fixed shelf.
- with handle (not for glass doors): available only for doors W. 23"5/8, equipped with removable cylinder in order to permit encoding's changes, provided with 1 key and 1 articulated key. Only handles with a holes distance of 5" must be used.

Hinges are made of steel and the opening is 110° with a soft-closing device.

Shelves

melamine: 3/4" thick chipboard (density 44.95 lb/ft³, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges) on the frontal side. Shelves are supported by holders witch are placed in the lateral side's holes.

glass: 1/8" thick extra-clear glass, with rounded corners and flat polished edges. Shelves are based on anti-slip rubber pads, supported by holders witch are placed in the lateral side's holes.

Finishing top and sides

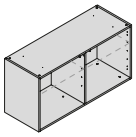

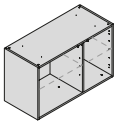

melamine: 3/4" thick chipboard (density 44.95 lb/ft³, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges).

lacquered: 3/4" thick chipboard (density 44.95 lb/ft³, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges). The surface is covered by a polyurethane varnishing.

veneer: 3/4" thick chipboard (density 44.95 lb/ft³, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), plated on both sides with natural veneer (thickness of 1/32") and edged on the exposed sides with veneer or ABS (thickness of 1/8") with rounded edges. Exposed surfaces are varnished with acrylic-based tints.

Pedestals

10 year warranty

Melamine pedestal on castors

Structure (sides, top, bottom and back)

melamine: made of chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) 3/4" th. for sides, top and bottom and 1/2" thick for back, faced with anti-reflex melamine resins and edged with ABS (1/2" thick with rounded edges for top and 1/32" thick for sides, bottom and back).

The bottom is equipped with threaded inserts for the insertion of 4 polypropylene and steel swivel castors (Ø 1"1/2). The version with filing drawer is equipped with a fifth castor mounted to support its weight when opened.

The pedestal is equipped with a mechanism that allows the simultaneous closing of all drawers.

Fronts

melamine: 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges).

The lock is positioned on the first drawer from the top and is equipped with an extractable cylinder which allows the coding to be changed. Two keys are provided and one of them is foldable. The fronts are equipped with a handle configuration (interaxe 5").

Drawers

in PVC: made of chipboard coated with a grey PVC finish and they run on partial extraction roller runners. They are equipped with a soft-closing system that allows the drawer to close softly.

Filing drawers

metal: consisting of a steel sheet painted with epoxy powders and mounted on partial extraction roller runners with a soft-closing system. Inside the lower drawer is a epoxy-coated steel sheet frame, used to support the hanging folders.

Pedestal on castors with melamine structure and veneer fronts and top

Structure (sides, top, bottom and back)

melamine: made of chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) 3/4" th. for sides, top and bottom and 1/2" thick for back, faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded edges for top and 1/32" thick for sides, bottom and back).

The bottom is equipped with threaded inserts for the insertion of 4 polypropylene and steel swivel castors (Ø 1"1/2). The version with filing drawer is equipped with a fifth castor mounted to support its weight when opened.

The pedestal is equipped with a mechanism that allows the simultaneous closing of all drawers.

Top

veneer: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), veneered on both sides with natural veneer approx. 1/32" thick and edged with 1/8" thick veneer or 1/8" thick ABS (depending on finish) with rounded edges. The surfaces are painted with acrylic-based stains.

Front panels

veneer: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), veneered on both sides with approx. 1/32" thick natural veneer and edged with 1/8" thick veneer or 1/8" thick ABS (depending on finish) with rounded edges. The surfaces are painted with acrylic-based paints. The lock is located on the first drawer from the top and is equipped with an extractable cylinder to allow variation of the code. Two directional keys are supplied, one of which is folding. The front panels are equipped for handles with 5" interaxial centre distance.

Drawers

in PVC: made of chipboard coated with a grey PVC finish and they run on partial extraction roller runners. They are equipped with a soft-closing system that allows the drawer to close softly.

Filing drawers

metal: consisting of a steel sheet painted with epoxy powders and mounted on partial extraction roller runners with a soft-closing system. Inside the lower drawer is a epoxy-coated steel sheet frame, used to support the hanging folders.

Metal pedestal on castors

metal: made of steel sheet. On the lower part of the structure there are two steel sheet beams with threaded inserts for screwing on polypropylene and steel swivel castors (Ø 1"1/2-2 per beam). All metal parts are epoxy-polyester powder coated with embossed finish.

Drawers

metal: made of steel sheet, epoxy-polyester powder coated in black (for black pedestal) and in grey (for grey and white pedestal). The drawers can be fitted on roller runners with partial extension with a soft-closing system that allows the drawer to close softly.

Orgatower

10 year warranty

External structure (sides, top, bottom and back)

melamine: made of 3/4” th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with 1/8” th. ABS with rounded edges on visible sides and 1/32” thick ABS on the other sides. The sides are fitted with polyethylene-coated steel feet with a maximum adjustment of + 1/4” for floor levelling. An 3/4” or 1” th. finishing top, plant box or doxbox must be added to the structure.

Pull-out internal structure (sides, top, bottom and back)

melamine: 3/4” th. chipboard for top, side and bottom and 1/2” th. for back (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), covered with anti-reflex melamine resins, edged with 1/32” thick ABS. Each side is equipped with double perforations (1”1/4 pitch) for attaching shelves. The structure is mounted on full-extension ball-bearing runners, installed on the external structure and equipped with closing damper. On the front of the internal structure there is a castor (Ø 3”) made of thermoplastic rubber for hard floors, mounted on a steel sheet bracket that is used to support the weight of the cabinet when the pull-out elements are open. The structure is equipped with front and rear stabilisers to align the sliding of the pull-out element and has an opening damper fitted on the lid of the external structure.

Shelves

melamine: made of 1” th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), covered with anti-reflex melamine resin and edged with 1/32” th. ABS with rounded edges. The H. 28”3/8 Orgatower has 1 shelf while the H. 44”1/8 one has 2 shelves as standard.

Finishing top

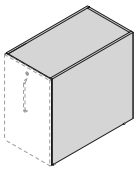

melamine: made of 3/4” or 1” th., depending on the desk’s height, chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), covered with anti-reflex melamine resins and edged with 1/8” th. ABS with rounded edges. It is fixed to the upper part of the structure by means of wood screws.

Front panel

melamine: made of 3/4” th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), covered with anti-reflex melamine resin and edged with 1/8” th. ABS with rounded edges. The front panel is attached to the internal pull-out structure. It’s equipped with a central vertical handle (centre distance 10”1/8) and with a lock with extractable cylinder to allow the variation of the code. They are supplied with 2 operating keys, one of which is foldable.

Sliding doors cabinets

Structure

melamine: composed of sides, top, bottom, central side and back made of chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), 3/4" thick, faced with anti-reflex melamine resins and edged with ABS 1/8" thick on visible sides. Lateral and central sides are provided with double holes pitch 1"1/4 to fix the shelves. Cabinets are provided with 2 movable shelves (4 shelves for cabinet H. 44"7/8 with two doors) made of 1" th. melamine. Top come with extruded aluminum rails which are placed into grooves to allow the doors' sliding movement. The doxbox cabinet is provided with an 3/4" thick central divider. The doxbox back can be upholstered on one side with fabric. The structure is provided with 8 ABS feet 1" high which allow an adjustment of +3/8" for floor levelling.

Doors

melamine: 3/4" th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS 1/8" thick. Each door has 2 upper carriages to allow the sliding of the rails and a lower profile which runs into a pivot fixed at the bottom. Each door is provided with an extractable cylinder lock to allow the change of the code. Two keys are also provided, one of which is folding. When the lock is in the closed position, a pivot on the rear side prevents both doors from sliding. Doors are equipped to fit handles with pitch 1"1/4 (vertical orientation).

Bookcase

Structure

melamine: composed of sides, central side, top, bottom and back made of chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), 3/4" thick, faced with anti-reflex melamine resins and edged with ABS 1/8" thick on visible sides. Two models are available: H. 32" (8 compartments on two levels); H. 47"1/4 (12 compartments on three levels). The case is provided with 8 ABS feet 1" high which allow an adjustment of +3/8" for horizontal levelling.

Desk-height cabinets with doxbox

Structure

melamine: composed of sides, top, bottom and back made of chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), 3/4" thick, faced with anti-reflex melamine resins and edged with ABS 1/32" thick. Each side has double holes pitch 1"1/4 to fix the shelves. The hinged doors cabinet is provided with a movable shelf made of 1" melamine. The case is provided with 4 ABS feet, 1" heigh, which allows an adjustment of +3/8" for floor levelling.

Finishing top

melamine: made of 3/4" or 1" thick, depending on the desk's height, chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS 1/8" thick. Top is fixed to the structure through screws suitable for wood.

Doors

melamine: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS 1/8" thick. The right door is provided with an extractable cylinder lock to allow the change of the code Two keys are also provided, one of which is folding. Left door comes with a PVC dust-seal. Hinges are made of steel and the opening is 110° with an integrated soft-closing device. Doors are suitable for handles with a pitch of 5".

Filing units

Structure and front panels are made of 3/4" thick particle board (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) faced with anti-reflex melamine resins. The front is edged with ABS 1/8" thick on visible sides.

Filing unit's frames are made of a steel sheet, epoxy coated. They are installed on Quadro ball bearing slides (max capacity 132.28 lb). They are provided with 2 dividing elements suitable for different hanging folders' dimensions. The standard frame is suitable for A4 hanging folders (pitch 13").

Filing unit is provided with anti-tilt system to allow a selected drawers' opening and to prevent the opening of all the drawers. The lock has an extractable cylinder to allow the change of the code. Two keys are also provided, one of which is folding. The filing units' front panels are suitable for handle with pitch of 5".

Doxbox

melamine: composed of sides, top and bottom made of 3/4" th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) faced with anti-reflex melamine resins and edged with ABS 1/8" thick. The back, made of 3/4" th. chipboard, can be upholstered one side only with fabric.

Spine - 1 side

Structure

melamine: composed of sides, top, bottom, central side and back made of chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), 3/4" thick, faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded edges or 1/32" thick). Lateral and central sides are provided with double holes pitch 1"1/4 to fix the shelves. The central sides divide the structure into two parts: one with an open compartment equipped with a 1" thick movable shelf, and the other with a unit with door and an open compartment with a movable shelf (1" thick) or a unit with door and a pedestal. The bottom is provided with 8 ABS feet 1" high which allow an adjustment of +3/8" for floor levelling.

Doors

melamine: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS 1/8" thick with rounded edges. The door is provided with an extractable cylinder lock to allow the change of the code. Two keys are also provided, one of which is folding. The hinged door has steel hinges with an opening of 110° with integrated soft-closing system. Swing doors are suitable for handles with a pitch of 5".

Pedestal

fronts: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), ffaced with anti-reflex melamine resins and edged with ABS 1/8" thick. The lock is located on the first drawer at the top and is equipped with an extractable cylinder to allow variation of the code. Two keys are provided and one of them is foldable. The front profiles are equipped with a handle configuration (interaxle 5").

drawer: made of epoxy-coated steel sheet, and it is installed on ball-bearing partial-extension and concealed slides with integrated soft-closign system.

Spine - 2 sides (2 sides cabinet)

Structure

melamine: composed of sides, top, bottom, central side and back made of chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), 3/4" thick, faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded edges or 1/32" thick). Lateral and central sides are provided with double holes pitch 1"1/4 to fix the shelves. The two lower backs are provided with a hole (Ø 3"1/8) for cable management. The central sides divides the structure into two parts: one closed by the back that conceals the cabling, the other composed as follows: with open compartment equipped with 1" thick movable shelf and a unit with door, or a unit with door and a pedestal. The bottom is provided with 8 ABS feet 1" high which allow an adjustment of +3/8" for floor levelling.

Doors

melamine: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS 1/8" thick with rounded edges. The door is provided with an extractable cylinder lock to allow the change of the code. Two keys are also provided, one of which is folding. Structure (sides, top, bottom and back)

melamine: made of chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI). Top, sides and bottom are 3/4" thick (edged with ABS on visible sides thickness 1/32"), back is 1/2" thick. They are faced with anti-reflex melamine resins and edged with ABS on visible sides (thickness 1/32"). Top, sides and bottom are milled to be connected with the back. Each side is provided with double holes (pitch 1"1/4) for hooking the shelves. A 1" thick structural shelf, made of the same material as the outer structure, is provided in some configurations. The structure comes with 4 rounded feet as standard (5 for 35"3/8 or 39"3/8 wide ones) made of ABS. Feet are 1" high. As an alternative, 1"1/8 high squared ABS feet are available. All feet allow an adjustment of +3/8" for levelling.

Structures with a depht of 13"3/8 - 14"1/8 and structures with a depht of 18"1/8 with filing unit must be fixed to the wall (hardware kit not included).

The version equipped with fridge comes with an opening placed at the bottom and one on the back to facilitate ventilation. The opening on the back is covered with an aluminium grid.

Shelves

melamine: made of 1" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges) on the front side. The shelf is supported by wooden dowels inserted into the side's lateral holes.

metal: made of a 1/32" thick epoxy-coated steel sheet, reinforced by lateral supports inserted into the side's lateral holes. The shelves are suitable to support hanging folders in A4 size (for D. 18"1/8 storage only). The thickness is 1". Metal shelves are available for melamine structures only.

Doors

melamine / lacquered: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" th. with rounded edges). Doors are also available covered with a polyurethan base laquered finish.

veneer: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), veneered on both sides with natural wood, approx 1/32" thick, edged with wood or ABS (1/8" thick rounded edges). The surfaces are varnished with acrylic-based paints.

Melamine, veneer and lacquered doors come with an extractable cylinder lock to allow the change of the code. Lock is provided with two executive keys for veneer doors or two keys, one of which is folding. H. 29"7/8 - 45"1/4 - 60"1/4 doors come with rotating cam lock. H. 75"5/8 - 90"1/2 - 104"3/8 doors come with sliding bars lock. The lock is secured by brackets fastened with screws to the top or to the structural shelf. Hinges are made of steel and the opening is 110° with integrated soft-closing device. 155° opening hinges with integrated soft-closing are optionally available. 35"3/8 - 39"3/8 wide storages come with a PVC dust seal on the left door. Doors are designed to accomodate handles with a pitch distance of 5".

glass: tempered glass (in accordance with EN 12150) 1/4" thick with polished edges. The glass is transparent, etched on the inner side or smoked. Doors come with an extractable cylinder lock to allow the change of the code. Lock is provided with two operative or executive keys, one of which is folding. The locking system is rotating cam lock. Opening is prevented by brackets fastened with screws to the bottom, the top or to the structural shelf. Lock is covered by zamak covers. Steel hinges with a 94° opening, covered with zamak covers and provided with an integrated soft-closing device. Doors are designed to accomodate handles with a pitch of 5".

glass with aluminum frame: tempered glass (in accordance with EN 12150) 1/8" thick with polished edges. The glass is etched on the inner side or smoked. The glass is surrounded by an anodized aluminum frame or epoxy coated frame. Doors come with an extractable cylinder lock to allow the change of the code. Lock is provided with two operative or executive keys, one of which is folding. The locking system is rotating cam lock. Opening is prevented by brackets fastened with screws to the bottom, the top or to the structural shelf. Hinges' opening is 110° and are provided with an integrated soft-closing device. 155° opening hinges with an integrated soft-closing are optionally available. 35"3/8 - 39"3/8 wide storages come with a PVC dust seal on the left door. Doors are designed to accomodate handles with a pitch of 5".

Fridge

Suitable for the right-hand compartment of the storage only, it is available in versions with 220/230 V power supply with 115 V power supply with B-type socket (grounded American type). The fridge is equipped with a central shelf, ice compartment and bottle compartment on the door.

Passepartout

Filing unit (for storage D. 18”1/8 deep only)

melamine / lacquered front panel: made of 3/4” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges). Front panels are also available covered with a polyurethan base laquered finish. They are designed to accomodate handles with a pitch of 5”.

veneer front panel: made of 3/4” thick particle board (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), veneered on both sides with natural wood, approx 1/32” thick, edged with 1/8” thick wood or ABS (1/8” thick rounded edges). The surfaces are varnished with acrylic-based paints. They are designed to accomodate handles with a pitch of 5”.

filing unit frames: made of epoxy powder coated steel sheet. They are installed on Quadro ball bearing slides and they are provided with 2 dividing elements suitable for different hanging folder dimensions. Filing unit frame is provided with anti-tilt system and a simultaneous lock on the top front. It is provided with a rotating cam lock. The lock comes with an extractable cylinder to allow the change of the code. Lock is provided with two keys, one of which is folding. Filing unit is provided with a soft-closing device. Storages with drawers must be fixed to the wall (hardware kit not included).

Finishing top and sides

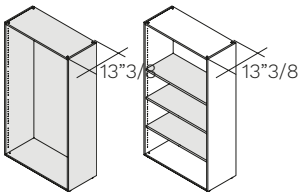

melamine / lacquered: made of 3/4” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” th. with rounded edges). Doors are also available covered with a polyurethane base laquered finish. Finishing top and sides are connected to the structure through screws suitable for wood.

veneer: made of 3/4” thick particle board (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), veneered on both sides with natural wood, approx 1/32” thick, edged with 1/8” thick wood or ABS trims (1/8” thick rounded edges). The surfaces are varnished with acrylic-based paints. Finishing top and sides are connected to the structure through screws suitable for wood.

10 year warranty

Structure (sides, top, bottom and back)

melamine: made of chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI). Top, sides and bottom are 3/4" thick faced with anti-reflex melamine resins and edged with ABS on visible sides (thickness 1/32"), back is 1/2" thick.

Doors

melamine: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS 1/8" thick. Hinges are made of nickel-plated steel and the opening is 110°. Optionally available 155° opening hinges. All doors are provided with an integrated soft-closing device. The doors are equipped to receive 2 numbers and they are also available with a paper slot.

laquered: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS 1/8" thick. Doors are covered with a polyurethane base laquered finish. Hinges are made of nickel-plated steel and the opening is 110°. Optionally available 155° opening hinges. All doors are provided with an integrated soft-closing device. The doors are equipped to receive 2 numbers and they are also available with a paper slot.

Lock types

Standard lock (Tipo A): with a pull-out cylinder for changing the code. It is supplied with two folding keys. The locking mechanism is a rotating blade.

Combination lock (Tipo B): ABS lock with customisable 4-digit numerical combination and has a rotary knob to open or close the door.

RFID lock (Type C), card included: lock with RFID technology that can be opened with pre-programmed cards.

Finishing top and sides

melamine: made of 3/4" thick particle board (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI, faced with anti-reflex melamine resins and edged with ABS 1/8" thick.

laquered: made of 3/4" thick particle board (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS 1/8" thick. Doors are covered with a polyurethane base laquered finish on request.

Movable shelf / Movable shelf for slot paper collection

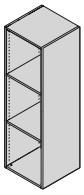

melamine: made of 3/4" thick particle board (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS 1/8" thick on the frontal side (max. load capacity: 99.21 lb).

Frame

metal: consisting of a steel sheet , epoxy coated. The frame is 1" height and is suitable for feet H. 1" only.

10 year warranty

Sides (end and intermediate)

The sides are made of two vertical uprights welded to horizontal beams. Uprights and beams are made of 3/4”x3/4” square section steel tubular bars, coated with epoxy powder and with an embossed finish.

The lower end of each upright has a cap into which a leveling foot is screwed, allowing a +3/8” adjustment for perfect adherence to the floor.

The uprights are available in 5 heights: 18”1/2 – 33”1/8 – 48” – 63” – 78”. The middle upright is provided with holes on both sides for the connection of modules. Sides depth 16”1/2.

Shelves

The shelves are made of a steel sheet element, with load-bearing function, bent and welded to form a “containing” tray. It is attached with screws to the side’s beams.

A finishing panel is placed inside the “containing” tray, which can be made of:

- metal: made of a bent steel sheet. The maximum load capacity is of 22.05 lb.
- melamine: 3/4” th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflective melamine resins and edged with ABS. The maximum load capacity is of 22.05 lb.
- painted glass: composed of two elements, one made of a 1/2” thick melamine panel, and above it a 1/8” thick glass panel, tempered according to EN 12150, painted with water-based tints on the lower side (if the painting is white or taupe, extra-clear glass is used). The maximum load capacity is of 22.05 lb.
- etched and painted glass: composed of two elements, one made of a 1/2” thick melamine panel, and above it a 1/8” thick glass panel, tempered according to EN 12150, etched on the upper side and painted with water-based tints on the lower side (if the painting is white or taupe, extra-clear glass is used). The maximum load capacity is of 22.05 lb.

The finishing panel can be attached to the metal tray with strong double-sided adhesive tape (not compulsory).

The element with load-bearing function, which normally accommodates the finishing panel, can be mounted upside down, becoming a shelf itself.

The shelves are offered in 2 widths: 15” and 29”7/8.

A W. 29”7/8 shelf with metal coat hanger is available. Shelf depth 16”1/2 (depth of shelf combined with blackboards is 15”3/4).

Backs

The backs are made of a steel plate, bent to form a vertical hollow box element on the inside, which must be completed with finishing panels.

It is attached with screws to the uprights. In the case of wall-mounted bookcases, it’s possible to install the back without an inner finishing panel.

Finishing panels can be made of:

- metal: bent steel sheet.
- melamine: 3/4” th. chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflective melamine resins and edged with ABS.

The finishing panels must be compulsory attached to the metal support with double-sided strong adhesive tape/magnet.

For each bookcase module it’s compulsory to provide at least one back that serves as bracing.

Back dimensions: W. 15” and 29”7/8 D. 3/4” H. 14”1/8. The metal back without finishing panel is also available in H. 29”1/8 to allow compositions without intermediate shelves.

Blackboard

Composed of a 3/4” thick writable mdf panel finished in glossy white laminate for whiteboard and matt black laminate for blackboard. The whiteboard can be written on with erasable markers, while the blackboard can be written on with chalks or liquid chalk markers.

TV stand module

This stand is made of four 3/4” thick melamine panels, joined together with screws and dowel nuts to form a kind of open box.

The module includes an adjustable VESA TV stand bracket to support monitor from 40” to 50” for W. 46”1/2 module and monitor from 40” to 65” for W. 60”5/8 module. The weight of the monitor must not exceed 132.28 lb. The bracket supports VESA 100x100 or 400x400 holes.

The TV stand module is equipped at the front with a Ø 3”1/8 hole and and laterally at the bottom with one Ø 2”3/8 hole for cable management and two Ø 2” holes for optional Netbox Spot sockets available with 1 Schuko socket or with 1 HDMI and 1 RJ45 network socket.

The TV module is attached to the sides’ beams and is intended for bookcases with a height of 48” – 63” and 78”. Bookcases with the TV holder module must be compulsorily fixed to the wall with brackets.

TV stand module dimensions: W. 46”1/2 D. 5”1/2 H. 29”7/8 (for screens up to 50”), W. 60”5/8 D. 5”1/2 H. 44”7/8 (for screens up to 65”).

Metal container

Made of a steel sheet, bent and welded, epoxy powder-coated with an embossed finish.

Dimensions: W. 15” - 29”7/8 D. 15” H. 5”7/8.

Phylo

Open storage unit

3/4” th. melamine structure (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflective melamine resins and edged with ABS.

Dimensions: W. 15” – 29”7/8 D. 15” H. 14”1/8.

Storage with hinged doors

3/4” th. melamine structure (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflective melamine resins and edged with ABS. The door is equipped with flap push-pull opening.

The storage must be placed at the bookcase compartments with backs.

Dimensions: W. 15” D. 15”3/4 H. 14”1/8 (1 hinged door)

W. 29”7/8 D. 15”3/4 H. 14”1/8 (2 hinged doors)

10 year warranty

Boiserie

Side finishing profiles

Made of anodized extruded aluminum, interlocked on ABS supports screwed laterally to the horizontal profiles. The profile is closed at the top by a light grey polypropylene cap.

Horizontal end profiles

Made with anodized extruded aluminum and used as first profile at the bottom and last profile at the top. The visible part has a height of 3/8". They are attached to the wall by zamak supports, fixed with plugs and screws. The supports that attach the profile prevent frontal release and only allow it to slide sideways.

Horizontal intermediate profiles

Made with anodized extruded aluminum and used between panel and panel. The visible part has a height of 5/8". The internal slot is compatible with the appropriate accessories. They are attached to the wall by zamak supports, fixed with plugs and screws. The supports that attach the profile prevent frontal release and only allow it to slide sideways.

Front panels

melamine: 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS.

lacquered: 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS and covered with a polyurethane lacquer.

veneer: made with 5/8" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), clad on both sides with natural veneer, approx. 1/32" thick, and edged with wood or ABS depending on the finish. The visible surfaces are painted with acrylic-based paints.

The panels are provided with horizontal millings on the rear side, on which supports are screwed to fit the panels to the profiles.

Hanging unit

Structure (sides, top, bottom, middle panel and back)

melamine: made with 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) for sides, top, bottom and middle panel, and 1/2" thick one for the back panel, faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded edges on visible sides).

In the case of the hanging unit with parallel upward opening, the bottom of the structure is 1" thick, and the W. 31"1/2 hanging unit has no middle panel.

lacquered: made with 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) for sides, top, bottom and middle panel, and 1/2" thick one for the back panel, covered with polyurethane-based lacquer and edged with ABS (1/8" thick with rounded edges on visible sides).

In the case of the hanging unit with parallel upward opening, the bottom of the structure is 1" thick, and the W. 31"1/2 hanging unit has no middle panel.

veneer: made with 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI) for sides, top, bottom and middle panel, and 1/2" thick one for the back panel, clad on both sides with natural veneer, approx. 1/32" thick, and edged with wood or ABS (1/8" thick with rounded edges on visible sides).

In the case of the hanging unit with parallel upward opening, the bottom of the structure is 1" thick, and the W. 31"1/2 hanging unit has no middle panel.

Hangers with adjustment are fitted behind the structure. Two types of supports are supplied as standard for supporting the hangers: one fits into the profile slots for attachment to the paneling and the other for attachment to the wall. The hangers are equipped with safety pins to prevent the hanging unit from coming loose.

Doors

melamine: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded edges)

lacquered: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded edges). The surfaces are covered with a polyurethane-based lacquer.

veneer: made of 3/4" thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8" thick with rounded edges). The visible surfaces are painted with acrylic-based paints.

The door can have three opening mechanisms:

- parallel lifting. A stabilizing bar that allows it to open correctly even when the push is not equal on both sides;

- downwards opening. A cable mechanism, assisted by hinges, allows opening downwards;
- hinged opening. A push-to-open ratchet allows the doors to open by rotating on the hinges up to 110°.

Shelf

melamine: made of 1” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” thick with rounded edges). The shelf has a milling for the insertion of the anodised extruded aluminium support profile provided with an anti-release gasket.

lacquered: made of 1” thick chipboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced with anti-reflex melamine resins and edged with ABS (1/8” thick with rounded edges). The surface is covered with a polyurethane-based lacquer. The shelf has a milling for the insertion of the anodised extruded aluminium support profile provided with an anti-release gasket.

veneer: made of 1”1/8 thick particleboard (density 44.95 lb/ft^3, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), veneered on both sides with natural veneer, approx. 1/32” thick, edged with wood or ABS (1/8” thick with rounded edges on visible sides). The visible surfaces are painted with acrylic-based paints. The shelf has a milling for the insertion of the anodised extruded aluminium support profile provided with an anti-release gasket.

glass: transparent or etched, tempered in accordance with EN 12150, 1/4” thick, inserted directly into the slot of the paneling profiles and equipped with anti-release transparent PVC gasket segments. The glass of the transparent shelf is made of extra-clear paste.

aluminium: 1/8” thick extruded anodized aluminum profile, directly inserted into the profile slot and equipped with anti-release gasket inserted in the profile.

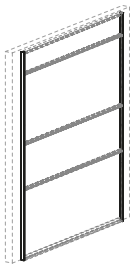

Objects holder and magazine holder

Made of anodized aluminum, inserted directly into the slot of the paneling profiles and held in place by a gasket inserted in the profile.

TERMS AND CONDITIONS OF SALE

1. INTRODUCTION

These Terms and Conditions of Sale ("Terms") govern the sale of products and services (individually and collectively, "Products") by Design Furniture Solutions, LLC., DBA Frezza America ("Seller"), a Florida limited liability company, to you - the end customer ("Buyer"). By placing an order and/or paying for any Products, the Buyer agrees to be bound by these Terms. These terms supersede and take precedence over any other terms and conditions Buyer may have proposed with respect to the purchase of any Products. These Terms and any price list provided by Buyer shall not constitute an offer or create any exclusive relationship, and may be amended at any time.

2. BUYER'S ORDER

Buyer's order for Products (a "Purchase Order") must be in writing and must provide complete physical address, telephone number, email address, for both billing and shipping purposes. Purchase Orders will not be entered into production until Seller has received all the necessary information and the sale deposit. Seller is not obligated to accept any Purchase Order, and may reject any Purchase Order, with or without cause or reason, in its sole and absolute discretion. Seller's acceptance of a Purchase Orders will be by means of a written acknowledgment, and such acceptance is contingent upon receipt of the corresponding deposit. Buyer is responsible for reviewing Seller's acknowledgment to verify that all the information is correct. Any changes must be made within forty-eight (48) hours from receipt of Seller's acknowledgment (the "Review Period") - otherwise the order will be produced according to the Purchase Order, as accepted and acknowledged by Seller. Upon expiration of the Review Period, Buyer may not cancel the order. If Seller, in its sole discretion, agrees to cancel the order, a cancellation or restocking charge, up to the total amount of the order, may be charged. No agent, representative, or salesperson is authorized to change prices, discounts, terms, or conditions of sale, without Seller's prior written authorization.

PLEASE NOTE: It is Buyer's responsibility to notify Seller of specific and local fire code and safety regulations for final Product destinations, and such notice must be included in the Purchase Order (for purposes of price quotes, such notice should also be made at the time of requesting the quote). Seller reserves the right to make changes in price, dimensions, design, materials, and/or construction, without notice at any time prior to Seller's acceptance of a Purchase Order. All measurements and weights are approximate, and subject to change without notice.

3. PRICES AND PAYMENT TERMS

3.1. Prices. Product prices are stated in U.S. Dollars, Ex-Works/EXW (INCOTERMS 2020) Seller's facilities in USA. Prices do not include shipping charges, packing and crating charges, in-transit insurance, storage charges, sales, use, or other taxes, or installation. Prices may be changed unilaterally by Seller at any time prior to acceptance of a Purchase Order and, if the cost of raw materials or production increases by more than 3% (three percent) during the period between Seller's acceptance of the Purchase Order, and the delivery date, Seller may unilaterally increase the sales price to cover such increase.

3.2. Price Adjustment for Tariff Changes. If, following Seller's acceptance of Buyer's Purchase Order, there is an increase of more than three (3%) in any tariffs, duties, or similar governmental charges imposed on the importation of the Product(s) under the Purchase Order, Seller may (in its sole discretion) increase the price of the pertinent Product(s) in an amount equal to the cost of the increase incurred by Seller with respect to such Product(s). In such case, Seller shall notify Buyer in writing.

3.3. Payment Method. Payment shall be made in U.S. Dollars by bank transfer, check, or credit card payments (subject to a convenience fee).

3.4. Payment Due Date. Payment in full is due in advance of delivery, with a fifty percent (50%) non-refundable deposit due on or before Seller's acceptance of the Purchase Order [OR - If the order contains custom specifications, a 100% non-refundable deposit is required]. Buyer waives and agrees not to claim any offsets based on separate orders.

3.5. Late Payment. Seller reserves the right to suspend delivery, charge storage costs, and charge interest at a rate of eighteen percent (18%) per annum from the date payment is due and until Seller receives payment in full. In addition, Seller may cancel pending Purchase Orders (even if already accepted by Seller) if Buyer fails to make timely payment of any Purchase Order.

4. DELIVERY

4.1. Delivery Ex-Works/EXW. All Products are sold and delivered to Buyer, Ex-Works (EXW) (Incoterms 2020) Seller's facilities in USA. Risk of loss or damage to the Products shall pass to Buyer when Products are placed at the disposal of Buyer or Buyer's carrier at such facilities (receipt of the Products by Buyer or Buyer's carrier shall constitute a delivery). Any documentation relating to the order of the Products shall be deemed to be validly executed on behalf of the Buyer upon execution by Buyer or any employee, agent or carrier of Buyer (even if such individual has not been given full authority by Buyer to bind Buyer). Buyer shall be responsible for insuring the Products upon delivery. Upon delivery, Buyer or Buyer's carrier shall be responsible for transportation of the Products to the destination specified in Buyer's order.

Packaging, marking, and labelling will be done in accordance with the applicable legislation in the place where Seller's facilities are located. Buyer is responsible for ensuring that the packaging, marking, and labelling of the Products comply with the legislation applicable at the Products' final destination.

4.2 Shipping. If the Purchase Order designates a destination (as opposed to pick-up at Seller's facilities) for delivery of the Products, the Products shall nevertheless de deemed to have been delivered Ex-Works (EXW) (Incoterms 2020) Seller's facilities in USA, upon collection at such location by the carrier, which carrier may be selected by Seller in its sole and absolute discretion. All shipments must be prepaid, unless Seller has been instructed to ship freight collect. Seller does not guarantee the arrival time of any shipment, nor shall Seller otherwise be liable for the performance of the carrier.

4.3. Delivery Date. The estimated delivery date for the Products will be stated in Seller's acceptance of the order. Seller may deliver all or part of any order of Products in advance, or subject to a reasonable delay, without Buyer being entitled to cancel the order (in whole

or in part), claim compensation or indemnity, or obtain any other relief that is not expressly set forth herein. Seller shall not, under any circumstances, be responsible for delays in delivery due to force majeure, failures by third parties, product availability, provisions put into force by public authorities, strikes, etc., or any other cause beyond the reasonable control of Seller (including but not limited to delays by suppliers).

4.4. Refusal of Delivery. Buyer will be deemed to have refused delivery of the Products upon the expiration of five (5) calendar days from the date Seller notifies Buyer that the Products are available for delivery, or such earlier date as Buyer notifies Seller of its refusal to take delivery. Any costs or expenses incurred by Seller due to Buyer's refusal to take delivery of the Products will be charged to Buyer. Without limiting the foregoing, should Buyer refuse to take delivery of the Products (in whole or in part), Seller may declare the order cancelled in whole or in part, store the Products at Buyer's sole risk, and seek damages, without limiting any other relief to which Seller may be entitled at law or in equity.

4.5. Risk of Loss. Risk of loss or damage to the Products passes to the Buyer upon delivery, or Buyer's refusal of delivery.

5. INSPECTION

All Products are delivered by Seller in good condition. Buyer must inspect all Products immediately upon receipt, prior to signing the paperwork indicating acceptance. Any discrepancies, damages, shortages, and other non-conformities related to the Products must be filed by Buyer, as applicable: (a) for external damage, immediately upon delivery; (b) for missing items, immediately upon delivery; and (c) for concealed damage, within five (5) calendar days from delivery.

6. WARRANTIES

6.1. Limited Warranty. Seller warrants to Buyer that the Products will be free from defects in material and workmanship for ten (10) years from the date of delivery to Buyer, unless otherwise stated for specific products in the price list. The warranty for manufacturing defects of mechanisms, electrical mechanism, electronic, mechanical, hydraulic and pneumatic components lasts 2 years from the date of delivery to Buyer. This warranty is non-transferable, and any unauthorized repairs and modifications shall render the foregoing limited warranty void.

6.2 Exclusions. Seller's limited warranty (set forth above) does not cover defects in materials supplied by the Buyer or damage caused by accident, transportation, abuse, misuse, neglect, alterations, modifications, normal wear and tear, or other condition not existing at the time of delivery of the Products.

6.3 DISCLAIMER. SELLER MAKES NO WARRANTY TO ANY THIRD PARTY AND, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, SELLER EXPRESSLY DISCLAIMS ANY ALL EXPRESS WARRANTIES (except the limited warranty to Buyer as set forth above) AND IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT. WE DO NOT WARRANT THAT THE PRODUCT WILL MEET YOUR REQUIREMENTS.

6.4. Warranty Claims and Support. To submit warranty claims and obtain warranty support services, the Buyer must contact Seller's customer service department at customercare@frezzamerica.com. Buyer must provide proof of purchase and a detailed description of the defect or issue to obtain service or relief for a warranty claim.

Upon timely receipt and verification of a valid warranty claim, Seller shall repair, replace, or provide a prorated rebate of the full purchase price of the Product as the sole and exclusive remedy for a breach of warranty. Replacement parts will be released at the same delivery point of the order for the original items that are being replaced. Seller may require the return of Products, or parts thereof, that Seller chooses to repair or replace. Buyer may not return any Products, or parts thereof, without Seller's prior written authorization. All returns shall be subject to verification on arrival at the location specified for the return of the Products or parts.

6.5 No Agency. Buyer is not authorized or empowered to make any representations or warranties on behalf of Seller, or to otherwise bind Seller to any obligation to any third party. Any warranty provided by Seller to any end customer shall be affixed to the Product, and Buyer may not alter or modify any such warranty in any manner.

7. RETURNS

Except as expressly set forth herein, no Products may be returned to Seller, and no refunds will be made by Seller.

8. LIABILITY

8.1. Limitation of Liability. Seller's entire liability for any claim arising out of or relating to the Products, including but not limited to the sale and use thereof and warranty claims, shall not exceed the purchase price of the corresponding Products.

8.2. Exclusion of Damages. Seller shall not be liable for any indirect, incidental, consequential, or special damage arising from or relating to the Products or the sale or use thereof.

8.3 Applicability. The limitation of liability and exclusion of damages herein apply in any action or proceeding, whether based on contract, negligence, or otherwise, even if Seller has been advised of the possibility of such liability, damages, loss, or injury.

9. INTELLECTUAL PROPERTY

The Product models shown in Seller's catalogues and described in price lists, as well as the trademarks and tradenames are, and remain, the property of Seller and/or Seller's suppliers, and are protected by trademark and/or copyright law. Seller reserves all rights to the design of the models shown. Many of the designs and technical features are further protected under international patents, either existing or pending. Seller protects all trademarks and products design by means of registration in the corresponding public offices. The reproduction of Seller's

catalogues, price lists, brochures, drawings, and all technical documentation is strictly prohibited. Advertising of the Products is prohibited unless authorized in writing, in advance, by Seller. Unless authorized in writing by Seller and/or its supplier, Buyer is not entitled to any right or license to use any of the intellectual property described herein. Buyer shall not either directly or indirectly reproduce or simulate, or cause or allow anyone to reproduce or simulate, any of such intellectual property. Further, Buyer is strictly prohibited from reproducing, or causing any third party to reproduce, any of the Product models or designs.

10. CHOICE OF LAW AND FORUM

Any controversy or claim arising out of, or relating to these Terms, or the sale or use of the Products, shall be determined by arbitration as governed by and interpreted under the internal laws (as opposed to conflicts of laws provisions) of the State of Florida, and the Federal Arbitration Act, administered by the American Arbitration Association under its Commercial Arbitration Rules (or, if the parties are domiciled in different countries, its International Arbitration Rules) in effect at such time and agree to execute any and all paperwork necessary to effectuate same; provided, however, that (a) either party may request and obtain preliminary injunctive relief pursuant to the applicable law (pending and subject to the arbitration award), and (b) the Florida statute of limitations (including without limitation, Chapter 95, Florida Statutes) are applicable to any claim arising out of, or relating to these Terms or this arbitration agreement. All arbitration hearings shall be conducted in the English language and shall be held in Miami-Dade County, Florida, U.S.A., by a single arbitrator who, at the request of either party, shall provide a written reasoned opinion. The award of the arbitrator shall be final and binding and judgment thereon may be entered by a court of competent jurisdiction. Should any provision, section or part of the Terms or this arbitration agreement be deemed illegal, invalid or unenforceable by a court of competent jurisdiction, that element of the Terms or this arbitration agreement may be severed and shall not affect the validity or enforceability of the remaining portions of these Terms or this arbitration agreement in that jurisdiction and judgment on the award rendered by the arbitrator(s) may be entered in any court having jurisdiction thereof. Each party agrees that service of process may be effected by notice given pursuant to the terms for notices given hereunder. In legal proceedings instituted to enforce these Terms and/or this arbitration agreement, the party who prevails in such proceedings shall be entitled to the award of its reasonable attorney's fees and dispute resolution costs, plus fees and costs incurred by it in executing and/or collecting any judgment, at all trial and appellate levels. This provision shall continue in full force and effect subsequent to and notwithstanding the expiration or termination of these Terms. The United Nations Convention on Contracts for the International Sale of Goods and the United Nations Convention on the Limitation Period in the International Sale of Goods, as amended from time to time, are excluded from application to these Terms or this arbitration agreement.

11. MISCELLANEOUS

These Terms will be binding upon and inure to the benefit of the Parties, their respective heirs, personal representatives, successors, and assigns. All remedies set forth herein are cumulative and are in addition to any other remedies available at law or in equity. These Terms shall not be interpreted or construed more strictly against the party causing these Terms to be drafted. No amendment, modification, termination, or attempted waiver shall be valid unless in writing signed by the party against whom the same is sought to be enforced. These Terms constitute the entire agreement between the parties hereto, and supersede all prior agreements, understandings, and arrangements, both oral and written between the parties hereto, with respect to the subject matter hereof. These Terms shall be construed and governed by the laws of the State of Florida, USA, without regard to its conflict of laws rules or comity. These Terms may be executed and delivered electronically and/or in hardcopy, in one document or in counterparts, each of which shall be deemed a duly delivered original and all of which together shall constitute one and the same instrument.
