Desk with return top. Available in 2 versions:
- Bronze painted structure with walnut melamine top
- Chromed structure with black ash melamine top

Spike, designed by architect Giorgio Topan, is an executive office furniture made of high quality materials and with a unique design.

The lightness of the design contrasts with the sturdiness of the structure made of thick steel sheets, which represent the main focus of the entire system. A versatile collection that offers both traditional and dynamic solutions thanks to the sit-stand system.

Desk with black embossed painted metal structure and hpl top.

Radar Armchair

Small armchair available in Rivet T7G3 fabric.

The **Radar** designer armchair by Claesson Koivisto Rune represents the epitome of refined, timeless design and craftsmanship.
A point of arrival for those who are dealing with the design of interdisciplinary spaces, Radar redefines the dimensions of the armchair, sinuously softening the shapes and giving it a three-dimensionality that turns it into an elegant protagonist of the space it is destined to inhabit.

Each version is characterised by the enveloping and curved combination of the body and backrest, made of metal covered with cold polyurethane foam and finally padded in fabric or leather: a trait that guarantees aesthetic and design unity.

Fior di Loto

Polypropylene multipurpose chair

Fior di Loto Plastic is Claudio Bellini's latest creation and maintains the precise aim of the entire collection: the creation of a seat that figuratively evokes the delicacy of a flower.

An interweaving of soft, light lines gives life to the seat's unibody, which is made of polypropylene.

Elegant and modern lounge chairs, perfect for furnishing restaurants, bars and meeting rooms.

The 4-leg frame Fior di Loto can in fact be an excellent solution for receptive environments such as bars and restaurants. The polypropylene frame, with its simple and essential design, is available in the same colour as the unibody.
